

Emus

Emus are Australia's largest bird.

They have wings but they do not fly.

Emus have light brown feathers. They have long necks and sharp beaks.

Emus live in flocks or pairs on grass lands in Australia.

Emus eat grains, flowers, berries, insects and grubs.

Emus

Did you know that they are the second largest bird on the planet?

Did you know the Noongar name for Emu is wetji?
